DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 200103101 A (Uehara et al) (see Machine translation).

Uehara et al disclose a method for producing hydrogen gas comprising the steps of: cutting or grinding aluminum or an aluminum alloy in water. (See entire translation the figure and the abstract). The limitations of claims 1 and 2, regarding the friction and mechanical fracture of the metallic material (i.e. the aluminum) are inherent in the process of Uehara et al.

Regarding claim 5-8, Uehara et al disclose the use of tap water (See [0028]). The use of tap water in Uehara et al process inherently provide for the limitations of claims 5-8. Note, that Federal Standards require that water to contain low concentrations of impurities and organic compounds that inherently have a resistance greater than 10 MΩ. Therefore no difference is seen between the instantly claimed invention and Uehara et al disclosure.
